Roman Horák. - 1st edition. - Plzeň : Publishing House Aleš Čeněk, 2022. - 239 p. - ISBN 978-80-7380-873-0. Sign.: F 20757, SF 1977 [IVANČÍK, Radoslav (100%)]</p> <p>The scientific monograph represents a significant contribution to the theoretical research of security and to the deepening of the forming complex theory of security through the definition of the basic theoretical and methodological starting points for its investigation as a complex, dynamic, multidimensional, multifactorial, and multisector phenomenon. It deals with the historical context of the formation of the security agenda, analyses the approaches of selected theoretical schools (directions) to security, analyses the current approaches to the study of security applied in the 21st century, deals with the theoretical-methodological and terminological starting points of the study of security and, in the end, discusses the theoretical starting points of the formation of the theory of security.</p> <p>According to the criteria of the Scientific Council of the Police Academy in Bratislava, which determine the segmentation of outputs, this is a scientific monograph that has objective significance in several countries, not only in the same region, which is why the author allowed himself to include this output in the A+ category.</p>

	<p>ISBN 978-80-7418-269-3. Sign.: F 19189 A [IVANČÍK, Radoslav (50%) - NEČAS, Pavel (50%)]</p> <p>This scientific monograph deals with the issue of private military companies, their definition, terminology, and typology. Private military companies are the type of non-state actors that have gradually established themselves under the influence of privatization and commercialization of the military and security sector, even in those areas whose agenda falls within the priorities of individual states. These companies originated from private capital for the purpose of making a profit, and today they represent one of the most dynamically developing areas, not only in the field of military and security, but also in the field of economy. In this context, the authors examine the positive and negative aspects of the practical operation of these companies and discuss the possibilities of regulating their operation. The monograph represents a highly current and original work, suitably responding to the current needs of theory and practice, which can be used at all levels of university study, within the professional community, but also for the public.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava stipulating the classification of outputs, the work is a scientific monograph of an objective significance for multiple states not only in one region, therefore, the author allowed herself to classify the output in the A+ category.</p>
3.	<p>AAA IVANČÍK, Radoslav - KELEMEN, Miroslav Bezpečnosť štátu a občana : Energetická bezpečnosť / Security of the State and Citizen: Energy Security / aut. Radoslav Ivančík, aut. Miroslav Kelemen, rec. Viktor Porada, rec. Jiří Straus. 1st edition. - Pilsen : Aleš Čeněk Publishing, 2013. - 177 p. - ISBN 978-80-7380-474-9. Sign.: F 17962 [IVANČÍK, Radoslav (50%) - KELEMEN, Miroslav (50%)]</p> <p>In this scientific monograph, the authors deal with one of the most discussed, most interesting, but also the most problematic areas of contemporary society - energy security. In addition to identifying, analysing and evaluating the basic, theoretical and terminological bases necessary for researching and solving the issue of energy security, they bring teachers, students, researchers and other interested parties the definition, definition and definition of energy security and other valuable information directly related to energy security (for example, on geopolitics, energy policy, energy relations, key energy resources, their exports and imports, as well as the importance for the further economic, social and political development of the state and its overall security.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava stipulating the classification of outputs, the work is a scientific monograph of an objective significance for multiple states not only in one region, therefore, the author allowed herself to classify the output in the A+ category.</p>
4.	<p>AAA IVANČÍK, Radoslav - JURČÁK, Vojtech Peace operations of international crisis management / aut. Radoslav Ivančík, aut. Vojtech Jurčák, rec. Paweł Czarnecki, rec. Antoni Olak, rec. Bogusław Ślusarczyk. - 1st edition. - Ostrowiec Świętokrzyski: University of Business and Entrepreneurship in Ostrowiec Św., 2013. - 181 p. - ISBN 978-83-936652-6-6. Sign.: F 20484 [IVANČÍK, Radoslav (50%) - JURČÁK, Vojtech (50%)]</p> <p>This scientific monograph provides the basic theoretical and terminological background necessary for the performance of international crisis management, with special emphasis on the characteristics and principles of conducting peace operations under the auspices of the most important international crisis management organizations - the United Nations, the North Atlantic Alliance, and the European Union. These are organizations that have the political and military capabilities to resolve the full spectrum of crises, whether emerging, escalating into conflicts or consolidating stability in post-conflict zones. The theoretical and practical contribution of the monograph lies in the fact that it provides comprehensive material for the study of peace operations to university students, their teachers and others interested in the issue. In addition, the researched examples given in the publication allow the reader to compare the theoretical conclusions of specific chapters with the real situation. Apart from the Slovak Republic, the monograph is used at several colleges and universities (not only in the military and security field) in the Czech Republic, Poland, Ukraine, Romania, but also in Germany and Belgium.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava stipulating the classification of outputs, the work is a scientific monograph of an objective significance for multiple states not only in one region, therefore, the author allowed herself to classify the output in the A+ category.</p>

The author examines information warfare as a wide range of activities whose tool or goal is information and information technology. The study addresses, for example, the dissemination of disinformation, propaganda, information and psychological operations, cyberattacks, disruption of communication networks and intrusions into them in order to obtain strategic information. At the same time, these activities in the conduct of the information war can take place even in times of peace, without having to prevent any conflict at all.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava stipulating the classification of outputs, the work is a scientific monograph of an objective significance for multiple states not only in one region, therefore, the author allowed herself to classify the output in the A+ category.</p>

These should be one of the key elements in ensuring Europe's long-term defence and security. In connection with the conflict in Ukraine and the annexation of Crimea, it draws attention to the need to modernize existing and build new defence capacities and capabilities of the armed forces of European states. The author considers the creation of a European army as one of the possibilities.</p> <p>According to the criteria of the Scientific Board of the Academy of the Police Force in Bratislava stipulating the classification of outputs, the work is a scientific monograph of an objective significance for multiple states not only in one region, therefore, the author allowed herself to classify the output in the A+ category.</p>
