The obtained result of the research activity is a very credible picture of the symptomatic threat to ordinary human communities. The text of the scientific monograph uses partially published materials obtained during the implementation of two research projects, the researchers of which were the Academy of the Police Force in Bratislava. Until the publication of the monograph, the issue of social pathologies occurring in the Slovak Republic was not an area of interest of Polish scientific communities dealing with social prevention, which should be considered in the era of European integration, free movement of persons and intermingling of cultures. A significant shortcoming until that period was, as the control of this specific arrangement of related rules is a challenge for all institutions and entities operating in the European Union's public security sector, the absence of similar information.</p> <p>According to the criteria of the Scientific Council of the Academy of the Police Force in Bratislava determining the segmentation of outputs, this is a scientific monograph that has objective significance in several countries not only in the same region, which is why the authors dared to classify this output in the A + category.</p>

The author deals with the issue of victims of crime with an emphasis on child victims of selected violent crimes. Among other things, primary attention is paid to some possibilities of assistance provided primarily by the state, while the author emphasizes the forms and scope of assistance to victims in the intentions of the Act on Victims of Crime. It also points to other forms, the implementation of which is in the competence of selected ministries, such as the Ministry of Justice of the Slovak Republic; Ministry of Labor, Social Affairs and Family of the Slovak Republic; Ministry of Education, Science, Research and Sport of the Slovak Republic and Ministry of the Interior of the Slovak Republic. In conclusion, we point out the possibilities of assistance provided by the so-called a third sector represented by selected civic associations. The supranational dimension of this chapter lies in the provision of processed information for the needs of security and legal education not only in the Slovak Republic but also in Ukraine and other countries from which the authors of individual chapters come.</p> <p>According to the criteria of the Scientific Council of the Academy of the Police Force in Bratislava determining the segmentation of outputs, this is a chapter in a collective monograph that was published abroad and has a broader international context, that is why the author dared to classify this output in the A category.</p>
